PROFESSIONAL SUMMARY

Detail-oriented B.Tech Computer Science graduate (2026) with foundational, hands-on experience in Python programming, object-oriented design, and application development gained through academic and project work. Comfortable working across the development lifecycle, from writing and debugging code to testing and documentation. Strong grasp of data structures, algorithms, and database fundamentals, with a demonstrated ability to quickly learn new tools and frameworks. Eager to contribute to the development, maintenance, and support of Python applications and services within a collaborative team environment.

TECHNICAL SKILLS

- Programming Languages:** Python (strong proficiency), Java, JavaScript
- Python Ecosystem:** Object-Oriented Programming, Data Structures & Algorithms, Exception Handling, Modules & Packages, Scripting, NumPy/Pandas (working knowledge)
- Web & Application Development:** HTML5, CSS3, JavaScript, REST API concepts
- Databases:** MySQL, Database Design (DBMS fundamentals)
- Tools & Practices:** Git & GitHub, VS Code, Debugging, Unit Testing basics, Agile/Team Collaboration, Software Development Lifecycle (SDLC)
- Core CS Concepts:** OOPs, Data Structures, DBMS, AI/ML Fundamentals

EDUCATION

B.Tech, Computer Science & Engineering — Siddharth Institute of Engineering and Technology, Puttur
2022 – 2026 | CGPA: 7.44 / 10

Intermediate (MPC) — Sri Vivekananda Junior College, 2020–2022 | 78%

SSC — Vijaya English Medium High School, 2019–2020 | 78%

PROJECTS (PYTHON-FOCUSED)

Deep Learning–Enhanced Click Fraud Detection System — Python, Scikit-learn, Pandas, NumPy

- Developed a Python application to detect fraudulent clicks in digital advertisements using a deep learning model, covering the full development lifecycle from design to testing.
- Wrote clean, modular Python code for data preprocessing, feature engineering, and model training, applying object-oriented programming principles for maintainability.
- Optimized model performance and reduced false positives through iterative debugging and tuning, demonstrating strong analytical and problem-solving skills applicable to production Python services.

Python Programming & Problem-Solving Practice — Python, DSA

- Built and maintained multiple small Python scripts and console applications to strengthen core programming fundamentals, including data structures, algorithms, and file handling.
- Practiced version control workflows using Git/GitHub for code management and collaboration readiness.

Portfolio & Web Interface Projects — HTML5, CSS3, JavaScript

- Designed and built responsive web interfaces (personal portfolio, task management dashboard UI), reinforcing skills in structured, maintainable code and cross-functional collaboration.

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL Certification – Introduction to Industry 4.0 & Industrial Internet of Things (IIT Kharagpur).
- "The Joy of Computing Using Python" Certification — reinforced core Python programming fundamentals.
- Deloitte Technology Virtual Experience Program — analytical & technology problem-solving.
- Maintained consistent academic performance with a 7.44 CGPA throughout B.Tech.

KEY STRENGTHS

Quick Learner | Team Collaboration | Analytical Thinking | Problem-Solving | Adaptability | Willingness to Learn New Technologies
